

Microsoft 365 Implementation Boot Camp

Boot Camp Description

If you are setting up Microsoft 365 or if you want to expand your use of Microsoft 365, this course is for you.

Although functionally easy to use, Microsoft 365 can quickly become disorganized, even chaotic, without a well-planned, comprehensive setup. In contrast, using the right MS365 applications in the right way will result in seamless management of documents, communications, tasks, and relationships.

This boot camp walks you, step by step, through the organization-wide implementation of Microsoft 365 and addresses best practices to maximize the effectiveness and efficiency of your company's use of Microsoft 365.

Attend the Microsoft 365 Implementation Boot Camp to...

1. Deploy, or expand your use of, Microsoft 365 in your business, including transferring email and files if applicable.
2. Modernize team collaboration, document sharing, and business information.
3. Centralize information through comprehensive Microsoft Cloud utilization.
4. Adopt best practices for the use of Microsoft 365 throughout your organization.

This Boot Camp is Designed For...

- Any business wishing to deploy Microsoft 365.
- Any business wishing to maximize its use of Microsoft 365.
- A single individual within the business who will become the Microsoft 365 "champion." This champion will...
 - Implement Microsoft 365 for the company.
 - Support the company's employees in the use of Microsoft 365 applications.

Agenda

Foundations for Success: Knowledge Management

- The Big Picture
 - Setup your Microsoft 365 account and Microsoft Edge profiles
 - Categorize work and associate outcomes with specific Microsoft 365 applications
 - Gather and catalog data to prepare for migration and/or Microsoft Cloud adoption
- Teams Foundations (Teams Part 1)
